

We are looking for a Utility Operator

If you are organized, accurate, efficient and looking for a part time position, we would love to hear from you.

This job is only an hour or two a day and is perfect for someone who is retired and looking to keep active. You won't be solely responsible for the water system but will work as part of our team of utility operators. In this position you will check the water plant daily to record readings from meters, test water quality and clean the filter system.

You'll also check the lift station to ensure the pumps are operating properly. You'll be available some weekends but we can arrange time off when you need it.
