

On February 3rd, 2025 we repaired a water main break on 2nd Ave East. To complete the repair we turned off the water for a short time. As a result, there is a small chance that bacteria may have entered the water line.

A boil water order has been issued for homes along 2nd Ave East from the shut off valve to the end of the line. A copy of the order is available on our website. Water should be boiled for one minute before being used for consumption.

We will test the water in the coming days and once it has tested as safe the boil water order will be lifted.

We do not believe there is any contamination to the water line. We did not open the main water line during the repair. However, it is important that we take the time to do the testing and ensure there are no issues to keep everyone safe.

Thank you for your understanding!
